M.S.D.G.C.
100 East Erie St.
Chicago, IL 60611

Dear Mr. Lue-Hing:

This is to confirm receipt of your February 29, 1987 letter concerning the district's recent activities at the Refinery Products/QuVoe chemical facility in Schiller Park, Illinois.

Pursuant to your request to be advised of any future remedial investigations and/or actions, enclosed is a copy of a proposed hydrogeologic investigation in and around the aforementioned site. The enclosure represents the third and final phase of the Refinery Product Remedial Action and is expected to commence early this summer.

Should you have any questions concerning past or proposed activities at the Schiller Park site, please feel free to contact me. I might add that I visit the Chicago area frequently on business and would be more than happy to meet with you to discuss any aspects of the project.

Sincerely,

Stephen A. Colantino
